The Cuban Economy: A Statistical Review, 1968-76 This publication is prepared for the use of U.S. Government officials. The format, coverage and contents of the publication are designed to meet the specific requirements of those users. U.S. Government officials may obtain additional copies of this document directly or through liaison channels from the Central Intelligence Agency.

Non-U.S. Government users may obtain this along with similar CIA publications on a subscription basis by addressing inquiries to:

Document Expediting (DOCEX) Project Exchange and Gift Division Library of Congress Washington, D.C. 20540

Non-U.S. Government users not interested in the DOCEX Project subscription service may purchase reproductions of specific publications on an individual basis from:

Photoduplication Service Library of Congress Washington, D.C. 20540

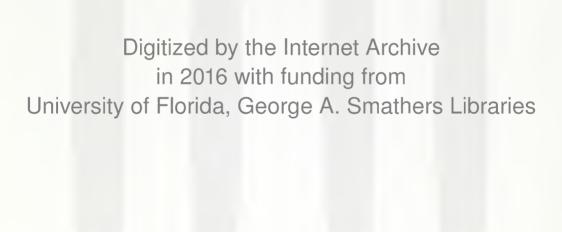

FOREWORD

This handbook on the Cuban economy provides a wide range of statistics of general interest. The handbook contains data on (a) gross national product, by sector of origin, (b) agricultural and industrial output, (c) the value, direction, and composition of foreign trade, (d) Cuba's terms of trade with its Communist and non-Communist trading partners, (e) economic assistance from the USSR and non-Communist countries, and (f) population and labor force. The coverage is focused on the years 1968-75; where possible, estimates for 1976 have been included. Many of the tables also include comparative data for 1957—the peak pre-Castro year.

The statistics were obtained mainly from official Cuban publications, supplemented with a small amount of data from a variety of non-Cuban sources. The index of Cuban gross national product was calculated from official data on production volume. The data on agricultural production, obtained from official Cuban sources, represent government procurement; total production of food is approximately 10% higher.

The statistics on foreign trade through 1975 have been taken primarily from Cuban publications. All value data reported in Communist currencies were converted to U.S. dollars at nominal exchange rates. The foreign trade estimates for 1976 are based principally on (a) part-year data published by Cuba's Communist and non-Communist trading partners, (b) volume and prices of sugar exports, (c) recent trends in Cuban trade with the Communist countries, and (d) estimated foreign financial assistance. The indexes of Cuba's terms of trade with the Council of Mutual Economic Assistance countries have been derived from data in Soviet and East European trade publications, and with non-Communist countries, from UN statistics. For the purpose of this report, Albania has been grouped with the East European Communist countries. Yugoslavia has been placed in the non-Communist category.

The estimates of Soviet balance-of-payments assistance are based on (a) inferred settlements to cover Cuba's trade deficit with the USSR, (b) estimated accrual of Cuban interest liabilities on outstanding debt to the USSR through 1972, and (c) estimates of other invisibles such as the wages of Soviet technicians in Cuba. Non-Communist economic assistance is made up of publicized government-guaranteed trade credits and Eurocurrency loans received since 1972. The population data are US Bureau of Census estimates based on the Cuban 1970 census.

COUNTRY BRIEF

Geography	
Area	114,478 square kilometers
Capital	Havana
Other major cities	Santiago de Cuba, Camaguey, Holguin, Guantanamo, Santa Clara, Matanzas
Chief ports	Havana, Santiago de Cuba, Matanzas, Nuevitas, Bahia de Nipe, Mariel
People	
Population	9.5 million (mid-1976)
Language	Spanish
Literacy	About 96%
Economy	
Estimated gross national product, 1974.	8.3 billion pesos (US \$7.5 billion at the adjusted monetary conversion rate)
Agriculture	Main crops—sugar, tobacco, rice, vegetables, citrus fruits
Major industries	Sugar milling, electric power, petroleum refining, nickel mining, food processing, cement
Exports	\$3.5 billion f.o.b. (1975 preliminary) sugar, nickel, tobacco, shellfish
Imports	\$3.8 billion c.i.f. (1975 preliminary) capital equipment, industrial raw materials, foodstuffs, petroleum
Major trade partners	Exports—USSR, Japan, Eastern Europe, Canada, People's Republic of China
	Imports—USSR, Japan, Eastern Europe, Spain, Argentina
Nominal monetary conversation rate	1 peso equals US \$1.21
Adjusted monetary conversion rate 1	1 peso equals US \$0.90

¹Obtained by adjusting the 1957 (free market) exchange rate by the estimated relative movements of the US and Cuban GNP deflators from 1957–74.

¹The indexes are based on official Cuban production data. Since recent prices are not available, they were constructed using 1957 price weights. Our indexes show much smaller increases than do Cuban data on economic growth as measured by "gross material product," apparently mainly because the Cuban measure is calculated in terms of current prices. The peso value of Cuban GNP in 1974 can be roughly estimated from official data on gross material product, defined as net output of goods and "productive" services (such as transportation and communication), by adding to it estimated value-added by other services such as education and health, as follows:

	Million Pesos
Gross material product	7,414
Value-added by services	850
Gross national product	8,264

¹Preliminary.

²Estimated.

³Clearing account deficit, i.e., trade defict excluding Soviet hard currency purchases of sugar.

⁴A Cuban-Soviet agreement of December 1972 exempted Cuban debt from further interest charges.

⁵Estimated Cuban debt to the USSR consisting of (a) an estimated \$4.05 billion in direct balance-of-payments assistance and (b) an estimated \$550 million in development aid. The USSR has agreed to postpone initial repayment of this debt until 1986. ⁶The sugar and nickel subsidies are estimated as the difference between the values of sugar and nickel exports to the USSR and the value of these exports if sold on the world market. They are considered a grant and are not subject to repayment.

⁷The petroleum subsidy reflects the difference between the value of petroleum purchased from the USSR and the value of these imports at world prices. It is considered a grant and is not subject to repayment.

²Estimated.

³See Table 24 for derivation of Soviet price subsidies.

Table 26

Publicized Economic Assistance from Non-Communist Countries Since 1972

Source	Value Million US \$	Date Authorized	Terms
Argentina	1,200	August 1973	Long-term credits for the purchase of Argentine industrial and transportation equipment; to be repaid in eight years from time of delivery.
Eurocurrency credits	30	1973	Medium-term credits.
Spain	900	December 1974	Trade credits for the purchase of Spanish ships and whole plants.
Eurocurrency credits	119	1974	Medium-term credits.
France	350	January 1975	Long-term credits for the purchase of French machinery, whole plants, and transportation equipment; to be repaid in ten years.
Canada	155	March 1975	\$100 million credit to be repaid in ten years at competitive interest rates; \$10 million development loan to be repaid over 30 years at 3% interest and a \$3 million technical assistance grant extended in February 1975; credits of \$24 million extended in December 1974 and \$18 million in April 1974 for purchases of oil tankers and rail equipment.
